

I have three suggestions for regulating telemarketers. 1) The first is that every telemarketer call must register a valid phone number and caller on caller ID systems. Currently, the vast majority show up as "unknown."

2) The second is that autodialers that result in completed calls without any marketer available (dead line) must be prohibited.

3) The third is that recorded telemarketing calls must be banned except to those who have opted in for such calls.
